Professional Summary

Computer Science student (6th-8th semester) with a strong foundation in backend development, systems architecture, and infrastructure management. Practical experience in building scalable APIs, full-stack applications, and managing self-hosted server environments. Passionate about system design fundamentals, low-level programming, and writing clean, durable code.

Education

2023–Present **B.S. in Software Engineering**, *Unileste*, Coronel Fabriciano – MG
Expected Graduation: 2027

Professional Experience

Oct/24 – **Software Engineering Intern**, *Objetiva Solução*, Ipatinga – MG

Mar/25 Worked on backend development and system maintenance, collaborating with the engineering team to build efficient, robust, and scalable software solutions.

- Assisted in developing internal tooling, backend APIs, and automation scripts to optimize engineering workflows.
- Identified, debugged, and resolved logical and system-level issues throughout the software development lifecycle.
- Collaborated in an agile team environment utilizing Git version control and clean code principles.

Projects

2025–2026 **Tucano & Tucano Play**, *Custom Programming Language & Web IDE*

Developed a custom programming language from scratch, implementing a lexer, parser, and interpreter that manages an Abstract Syntax Tree (AST). Built a full-stack, web-based educational IDE for the language.

2026 **Comprescan**, *Mobile Application*

Developed a React Native application to scan physical receipts, parse the extracted data, and automatically generate financial statistics and inventory records.

2026 **Self-Hosted Infrastructure**, *Home Lab / Mini Cluster*

Architected and currently maintain a custom multi-node Linux application server and NAS cluster, utilizing NFS and SSHFS for secure network orchestration and data management.

Technical Skills

Languages TypeScript, Node.js, JavaScript, Python, Java, C#, .NET, C/C++, Lua.

Frameworks Next.js, React Native, Express, NestJS, REST APIs.

Infra & Systems Advanced Linux, Docker, Self-Hosting, Reverse Proxies (Nginx / Apache), Git.

██████████ Languages

English Professional Working Proficiency (Technical documentation and communication).
Portuguese Native.
