## Professional Summary

---

Computer Science student (6th semester) with a strong foundation in backend development, systems architecture, and infrastructure management. Practical experience in building scalable APIs, process automation, and managing self-hosted server environments. Passionate about software craftsmanship, system design fundamentals, and writing clean, long-lasting code. Exceptional analytical skills with a proven track record of debugging complex software problems and collaborating in agile teams.

## Education

---

**Unileste**

*B.S. in Computer Science*

Currently in the 6th semester. Expected Graduation: 2027

**Coronel Fabriciano – MG**

*2023–Present*

## Professional Experience

---

**Objetiva Solução**

*C# Developer Intern*

**Ipatinga – MG**

*Oct/24 – Mar/25*

Worked on backend development and system maintenance, collaborating with the engineering team to build efficient, robust, and scalable software solutions.

- Assisted in developing internal tooling, backend APIs, and automation scripts to optimize engineering workflows.
- Identified, debugged, and resolved complex logical and system-level issues throughout the software development lifecycle.
- Collaborated in an agile team environment (Scrum/Kanban) utilizing Git version control and clean code principles.

## Technical Skills

---

**Languages & Runtimes:** TypeScript, Node.js, JavaScript, Python, Java, C#, .NET, C/C++, Lua.

**Frameworks & Web:** Next.js, React Native, Express, NestJS, REST APIs.

**Infra & Systems:** Advanced Linux (system optimization, kernel management), Docker, Self-Hosting, Reverse Proxies (Nginx / Apache), NFS, SSHFS, Git.

## Core Competencies

---

**Communication:** Strong communication skills, clear technical reporting, and ability to bridge technical concepts with business requirements in collaborative environments.

**Problem Solving:** Analytical mindset focused on system debugging, data pipeline optimization, and resolving backend architectural inconsistencies.
